Education

B.Tech in Electronics and Communication Enginnering

2024 – 2028

National Institute of Technology, Delhi

CGPA: 7.8 / 10.0

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Backend: Node.js, Express.js, Meteor.js, Convex, Supabase, RESTful APIs

Frontend: React.js, Next.js, Vite, Astro, Tailwind CSS

Databases: Convex, MongoDB, PostgreSQL

Tools & Platforms: Clerk, Firebase Auth, Playwright, Docker, Kubernetes, Git, Render

Experience

Open Source Contributor – Rocket.Chat

Feb 2026 – Apr 2026

Meteor, TypeScript, React.js, Node.js

- Contributed to the Rocket.Chat open-source communication platform by working on frontend and backend improvements.
- Improved application functionality and developer experience by fixing bugs and enhancing existing features.

Projects

Portal – Realtime Conversation Platform — [GitHub](#) — [Demo](#)

Dec 2025 - Mar 2026

Next.js, Convex, TypeScript, Tailwind CSS, Clerk

- Built a realtime conversation platform supporting messaging, voice/video calls across group and private chats.
- Implemented typing indicators, presence tracking, and notifications using Convex for seamless realtime updates.
- Integrated authentication and user management using Clerk.

Wanderly – AI-Powered Travel Planning Platform — [GitHub](#) — [Demo](#)

Sep 2025 –

Nov 2025

React.js, Vite, Leaflet.js, Gemini API, Firebase Auth, Tailwind CSS

- Developed an AI-powered travel planner that generates personalized itineraries based on user preferences, destinations, and travel duration.
- Integrated Gemini API to dynamically generate travel plans and recommendations based on user inputs.
- Implemented interactive map visualization using Leaflet.js.

Certifications & Achievements

- Winner — SmartCodeWeb 2.0 Hackathon (UI/UX Track) at NIT Delhi, ranked 1st among 100+ participants.
- Achieved 1100+ rating on Codeforces through consistent participation in competitive programming contests.
